

INDUSTRIAL MACHINE MAINTENANCE DIVISION

CNC • VMC • LASER CUTTING MACHINES • ELECTRICAL • AUTOMATION • HYDRAULICS • PNEUMATICS • PREVENTIVE MAINTENANCE

Keeping industrial machines reliable, productive, and ready for production.

1. ABOUT CRECER GRANDE

Creceer Grande is an engineering and industrial services venture focused on helping manufacturing and engineering businesses improve machine uptime, source industrial components, manage engineering work and strengthen business documentation. We combine engineering capability, an on-demand technical network and practical manufacturing support to provide flexible solutions without the overhead of a large permanent organisation.

2. ABOUT THE DIVISION

Creceer Grande - Industrial Machine Maintenance Division provides breakdown support, preventive maintenance, troubleshooting, installation and technical assistance for CNC, VMC, laser cutting and other industrial machinery. The division is supported by an on-demand technical network of engineers and technicians deployed according to machine type, fault condition, location and service requirement.

3. OUR CAPABILITIES

Machine Maintenance & Troubleshooting

Multi-discipline support under one coordination point

- Mechanical troubleshooting
- Electrical fault diagnosis
- Control-panel checks
- Sensors, switches and interlocks
- Motors, contactors and relays
- PLC / HMI diagnostic support
- Servo and drive-related diagnostics
- Hydraulic and pneumatic troubleshooting
- Utility and auxiliary-system checks

Breakdown Maintenance & Fault Diagnosis

Restore functionality safely and define the next action

- Mechanical: noise, vibration, bearings, drives, couplings, lubrication
- Electrical: power / control circuits, motors, sensors, wiring, supplies
- Automation: PLC, HMI, servo / drive alarms, I/O, interlocks, communication

Preventive Maintenance

Inspect before deterioration becomes downtime

- Cleaning and visual inspection
- Lubrication condition
- Belts / couplings / bearings
- Electrical terminals and cooling fans
- Sensors, switches and safety interlocks
- Hydraulic / pneumatic leaks and FRL units

AMC & Scheduled Maintenance

Flexible planned-maintenance modes

- Single planned visit with service report
- Monthly / quarterly preventive visits
- Maintenance history and action tracking
- AMC with agreed machine coverage and scheduled PM
- Priority terms, exclusions and consumables defined commercially

Laser Cutting Machine Support

Machine and auxiliary-system diagnostics

- Machine alarms and electrical / control checks
- Motion, sensor and drive issues
- Chiller and water-circulation faults
- Pump / flow related alarms
- Cutting-head peripheral checks
- Gas / pneumatic auxiliaries
- Preventive maintenance

Chiller & Auxiliary System Support

Cooling faults can stop an otherwise functional laser machine

- Water circulation and pump operation
- Flow / level indications
- Hoses, sensors and electrical supply
- Cooling-system alarms
- Replacement support for pumps, sensors, relays and compatible auxiliaries

Installation, Relocation & Commissioning

Disconnect. Move. Position. Reconnect. Verify.

- Pre-shift assessment and disconnection planning
- Mechanical dismantling / positioning support
- Electrical identification and reconnection
- Basic levelling / alignment support
- Start-up, alarm / interlock checks and trial run

4. BREAKDOWN RESPONSE APPROACH

- Receive fault details
- Remote / initial triage
- Deploy suitable resource
- Diagnose at site
- Repair or define action plan
- Test and report

5. REPAIR, MODIFICATION & IMPROVEMENT

- Repeated failures may require engineering review
- Repair, redesign or reverse engineering
- Manufacture / source a custom replacement
- Install and verify

6. SERVICE SCOPE CONFIRMATION

- Machine make/model and controller are reviewed first
- Fault symptoms and site conditions define resource selection
- OEM-restricted work is subject to access, approvals and technical documentation

7. WORKING PRINCIPLE

- Understand the actual fault first
- Avoid unnecessary part replacement where possible
- Document the work performed
- Recommend practical next actions

9. WHAT YOU CAN SEND US

Machine Details

Make, model, year, controller and machine type.
Alarm / Fault

Alarm code, message, symptom or abnormal behaviour.
Photographs / Video

Panel, machine, damaged component or fault behaviour.
Service History

Recent breakdowns, repairs, replacements or recurring issues.
Manual / Drawing

Available electrical, hydraulic, pneumatic or machine documentation.
Site Requirement

Location, preferred visit date and production urgency.

10. WHY CRECER GRANDE

- On-demand multi-discipline engineering and technician network
- One-window maintenance, engineering, spares and manufacturing support
- Fault-based approach with clear reporting
- Flexible engagement for breakdown, PM, periodic visits or AMC

11. OUR VALUE PROPOSITION

DIAGNOSE. RESTORE. MAINTAIN. IMPROVE.

Crecer Grande can coordinate the engineering and technical support required to keep industrial equipment productive - from breakdown diagnosis to scheduled maintenance and improvement support.
